

Hands-On LEARNING LAB

A COMPLETE GUIDE FOR SUCCESS IN YOUR OWN OFFICE

WHY?

- Attract new patients like never before!
- Create a fun, interactive atmosphere that will catapult kids toward a lifetime of personal health.
- Rejuvenate your hygiene program around an exciting new approach.
- Have the confidence to help in the fight against childhood obesity.
- Mentor kids toward dental health professions.
- Become the “Amaazing!” talk of your community!

WHAT IS IT?

Science Experiments

The Hands On Learning Lab Kit™ contains 50 super-engaging science experiences to enhance an ordinary prophylaxis appointment. Shifting from a teach-and-tell model to a learning model that engages the child's own discovery is an awesome transformation—it is the way young brains are wired to learn. This kit also contains several guest-authored articles and DVD tutorials that will help your team members become expert health change facilitators.

Self-Prophecy

The self-prophylaxis model is an exciting paradigm shift from the traditional rubber cup prophylaxis. Learn a hands-on approach to the layered skill-building that leads to a lifetime of oral health. This kit contains an entire section on best practices of self-prophylaxis including a lengthy DVD tutorial.

Exposure to Dentistry as a Career

The Experiment Tracking Record© allows kids to choose their own hands-on experiments so they really look forward to their next visit. Science lovers will enjoy dental “procedures” and gain a new perspective in dental health careers.

THE KIT CONTAINS:

- Paper and digital content of all materials
- DVD training tutorials and interviews
- Marketing concepts and advertising materials
- Easy to customize format for a quick start in your own office

Cost: \$1295
